

## Montana CWD Hunter Harvest Submission Form

Use a separate form for each animal. Samples without location information will not be tested.

<b>Hunter Name:</b>	
<b>Hunter Phone #:</b>	<b>Hunter Email:</b>
<b>This is animal number _____ of _____ animals.</b> If samples from multiple animals are being sent in, each animal must have its own submission form. Label the submission form, the sample bags, and your meat/animal with corresponding numbers so the test result is traceable to an individual animal.	
<b>Species:</b> Mule Deer                  White-tailed deer Elk                          Moose	<b>Sex:</b> Male                  Female  <b>Age:</b> Fawn                  Yearling                  Adult
<b>Location of Harvest:</b> (This is important! Samples without location information will not be tested) Township: _____ Range: _____ Section: _____  Latitude: _____ Harvest site address: _____  Longitude: _____	
<b>Comments:</b>	

### CWD Hunter Harvest Submission Form Guidelines:

Thank you for your help as we fight CWD together. Fill out this form completely, including your phone number and email address so we can send you a unique CWD number. This CWD number is what you will use to look up your test results online at [fwp.mt.gov/CWD](http://fwp.mt.gov/CWD) within 3 weeks.

Accurate location of the harvest site is required. Samples without location information will not be tested.

Provide a latitude and longitude location if you recorded the harvest site with a GPS unit or a Hunt app. Otherwise, you can use the FWP Hunt Planner Map ([fwp.mt.gov/gis/maps/huntPlanner](http://fwp.mt.gov/gis/maps/huntPlanner)) to pinpoint the harvest site and record the Township, Range and Section ("TRS") provided in the pop-up box. If you are unable to pinpoint the harvest location using the methods above, provide a physical address or specific location comments for the harvest site.

If you are submitting samples from multiple animals, fill out a separate submission form for each animal sent to the Wildlife Health Lab. Please label the submission form, the sample bags, and your meat/animal with corresponding numbers so the test result is traceable to an individual animal.

## **How to ship your CWD samples to the Wildlife Health Lab:**

Please watch the “How to collect lymph nodes” video online at [fwp.mt.gov/CWD](http://fwp.mt.gov/CWD).

Put the lymph nodes in sealed bag (Ziplock bags or a similar brand work best), double bag the sample, and wrap the bag in a paper towel.

Put the filled-out submission form in a separate Ziplock bag so it doesn't get wet and include it with the sample. If you are sending samples from more than one animal fill out a separate submission form for each animal and make sure that each form is with the correct sample in a sealed bag.

Place the bagged samples, a cold ice pack, and the bagged submission form(s) in a small box or shipping envelope and send via your choice of postal carrier.

We recommend using a carrier that offers tracking and will deliver your samples within 24-48 hours to prevent the samples from rotting. Please try to ship your samples on Monday, Tuesday or Wednesday of each week, and avoid shipping on holidays, to prevent the samples from sitting over the weekend.

Ship to:

Montana Fish, Wildlife & Parks  
**ATTN: Wildlife Health Lab (CWD)**  
1400 S. 19<sup>th</sup> Avenue  
Bozeman, MT 59718
